

# Digital Luggage Scale

130 grams

---

Guide

**Below**

Thank you for purchasing our Digital Luggage Scales. You'll be able to use these scales to check the weight of your bags prior to boarding flights. It also can fill in as an emergency power bank, to give your phone some extra battery life if it's running low. Finally, it has a torch that'll help you get around strange cities at night, or even just let you read a book in a hostel dorm. Our Digital Scale is a great multipurpose travel companion for your next trip.

## **Weighing**

Hold the Scale horizontally, so that the strap drops down vertically and then press the Power button. After a second the display will show 0.00 and can now be used to weigh an item. If you're using a basket to hold the item then hang this from the Scale prior to pressing the Power button. This will allow the Scale to factor in the weight of the basket. You'll be able to add the item(s) to the basket and it will only show the weight of the items, and not include the weight of the basket.

## **Hold**

Once the weight has been determined and displayed on the screen the Scale will show "Hold". You can now remove the item. To reset press the power button again. You can now repeat this process to measure another item.

If the total weight of the items **exceeds 50kg** then the screen will show “ERR”. Release the weight from the Scale immediately to avoid damage.

### **Units of measurement**

At any time you can press the UNIT button to change the display between grams, ounces, kilograms and pounds.

### **Torch**

When the Scale is powered off you can switch on the Torch by pressing the UNIT button. Turn off the Torch simply by pressing the same button again.

The Torch will automatically switch off after 2 minutes. To prevent this turn on the scales in weighing mode. Then press and hold the Unit Button until “L-ON” appears on the screen. Now turn the Scale off. Next time you use the torch it will not automatically switch off.

### **Powering off**

Hold the Power button for 2 seconds to power off. If the Scale is locked then first press the Power button to unlock it and then hold for 2 seconds. The Scale will automatically turn itself off after 60 seconds of inactivity.

## Charging

The Scale can be charged from a computer or from a 5V USB Power Supply using the provided cable. While charging the red indicator will flash. When fully charged disconnect the cable to prolong the life of the battery.

When used as a power bank the blue indicator will flash. It stops when the Scale battery needs to be recharged.

## Notes

- Charge the Scale prior to use
- Keep the product dry and wipe with a soft dry cloth to clean. Do not use detergents as this may damage the shell
- Avoid exposing the Scale to sources of heat
- If you have any issues please contact us at [hello@below7.com.au](mailto:hello@below7.com.au)
